PRODUCTS THAT ENSURE ULTIMATE RELIABILITY IN ANY SITUATION

Rondal designs and manufactures high-performance systems and equipment for superyachts. Rondal is recognized as the best for its unrivalled Dutch build quality and innovative technical solutions, achieved through a dedicated focus on continuous improvement in both products and services.

As a building partner, Rondal leverages decades of experience and unburdens the client by taking on turn-key projects. The products of Rondal ensure ultimate reliability in any situation.

The Rondal team consists of approximately 75 professionals. The workforce includes highly qualified engineers, composite workers, CNC machine operators, welders and mechanics as well as a host of complementary specialists.

With decades of experience in composite and aluminum engineering and manufacturing, Rondal serves the market with specialized products for both sailing yachts and motor yachts.

RONDAL ENTRANCES ENGINEERED FOR EXCELLENCE

In the world of superyachts, perfection is key. Design, functionality, and reliability come together in Rondal's entrance solutions. Our custom-built systems are designed to exceed the highest standards, combining advanced technology with refined aesthetics. For both motor yacht and sailing yacht.

Every door on a superyacht must be more than just functional—it must be durable, seamless, and elegantly designed. Rondal doors are engineered for ultimate reliability and performance, even in the most demanding conditions.

KEY FEATURES

- **Silent spindle or belt drive operation**
 - Smooth, whisper-quiet performance.
- **Compact and efficient drive systems**
 - Space-saving and powerful.
- **Automatic and rapid air seal deflation**
 - Ensures quick transitions and effortless usability.
- **Durable materials**
 - Available in stainless steel, aluminum, or lightweight carbon fiber.

Our doors are fully customizable to match any yacht's design and functional needs. Options include Total Flush Sliding Doors for a sleek, minimalist look, L-shaped sliding doors, and models with vertically or horizontally moving panels. Featuring advanced glass technology and inflatable seals for complete weathertightness, Rondal's exterior sliding doors combine state-of-the-art engineering with modern yacht aesthetics.

UNLIMITED DESIGN FREEDOM

Whether you need a curved or straight design, our doors can be tailored to match your vision. Materials like stainless steel, aluminum, or lightweight carbon fiber, combined with customizable shapes and finishes, provide endless possibilities for bespoke designs.

ROLLER SHUTTERS

Rondal's roller shutters provide a robust yet sophisticated solution for onboard security and access control. Designed for ease of use and maximum reliability, these systems integrate seamlessly into any superyacht.

KEY FEATURES

- **Plug & Play system**
 - Quick and easy installation.
- **Fully automated**
 - Intuitive operation for effortless control.
- **Class-approved options**
 - Meets marine safety regulations.
- **Premium materials**
 - Available in glass or teak for a luxurious finish.
- **100% custom-made**
 - Designed to fit the yacht's specifications and aesthetics

Based on proven concepts, our roller shutters deliver the perfect balance of function and style.

COMPANIONWAYS

A companionway is essential for safe and comfortable access between decks, especially on sailing yachts. Rondal's companionways combine advanced engineering with full customization, ensuring both practicality and elegance.

KEY FEATURES

- **L-shaped design**
 - Space-efficient and visually refined.
- **Advanced sliding mechanism**
 - Top-mounted drive with smooth bottom gliding.
- **Manual operation**
 - Smooth and easy in use.
- **Electric operation**
 - With an optional USP backup battery for reliability.
- **High-end materials**
 - Glass combined with a strong aluminum or carbon frame.
- **Touchless operation**
 - Controlled via sensor or push-button.
- **Class approved**
 - Built to meet the highest safety standards.

Our fully customized companionways ensure a seamless transition between interior and exterior spaces while maintaining an exclusive, high-end appearance.

DECK HOUSE ENTRANCE

The deck house entrance plays a crucial role in both yacht ergonomics and aesthetics. Rondal's deck house entrances integrate cutting-edge technology with sleek, innovative design.

KEY FEATURES

- **L-shaped construction**
 - Elegant and functional access.
- **Two-part design**
 - Lower section moves downward, upper section slides forward.
- **Electric or manual operation**
 - Optional USP backup battery for added security.
- **Durable materials**
 - Available in glass, composite, stainless steel or aluminum.

This entrance solution offers ultimate flexibility and can be fully customized to match the yacht's unique design and owner preferences.
